Sensors, Embedded Systems and Algorithms for Service Robotics

2025/2026

Report 1 ¹

Date, 11/11/2025

Group n° 14

Luigi Muratore — S333098

Francesco Licci — S338759

Davide Tocci — S344917

Peter Furlan — S344945

Marat Perez — S336992

Objective

The aim of this laboratory activity is to ...

- Study ROS 2
- Implement
- Practice ...

Design

Provide a concise description and comments on the main structure of your ROS 2 program (do not copy your code in the report, just highlights the main elements and the workflow: nodes, publishers/subscribers to relevant topics and parameters)

TASK 1

If necessary, you can put design details in specific sub-sections.

TASK 2

Experiment

Describe here how did you conduct the experiments. Specify how many runs, which parameters did you change, etc. ...

SIMULATION

REAL ROBOT

Results and Discussion

This section shall include all the numerical and graphical results, along with significant comments on them.
